FOCUS 5.0 PUMP SYSTEM

- 1,200 psi / 83 bars
- 4.0 US gpm / 15.14 lpm
- 5 hp / 3.7 kW

DESCRIPTION

The FOCUS 5.0 pump features a Variable Frequency Drive (VFD), ensuring exceptionally quiet operation for its capacity while maximizing energy efficiency. It maintains a steady line pressure of 1,200 psi (83 bars) and supports up to 307 nozzles.

Unlike other pumps, the FOCUS series is a closed loop system featuring a high pressure flexible line that is continuously charged. This continuous charge allows for instant start/stop fog humidification regardless of the distance between the pump and atomizing nozzles.

All FOCUS units are designed with a hygienic flush feature that changes the water in the hydraulic system on a daily basis. Incoming water is returned through a carbon filter, sediment filter and UV light for sterilization which ensures superior water quality and bacteria-free fog.
